PERSONAL STATEMENT

A creative thinker, adept in user interface/experience/graphic design, software development and working with various data structures with a demonstrated history of working in the information technology industry.
Knowledgeable in the user interface, testing, and debugging processes. Vast experience in the Blockchain, Shypping, E-commerce, and Finance domain for over 5 years combined.

Able to effectively self-manage during independent projects, as well as collaborate as part of a development team. Eager and ready to leverage my technical and administrative skills to best serve.

I've also written smart contracts related for Vesting, Airdrops, Presale, NFTs, NFT marketplaces, Decentralized finance (Flash Loans, Lending/Borrowing, DEX, etc), and various web applications.

SKILLS

- **NodeJs**, **JavaScript, Typescript, GraphQL**, Python, **Solidity, Hardhat, Truffle, Ganache.**

- **Avalanche network, Ether.js, Web3.js, Thirdweb, @Rainbow-me, Wagmi, Molaris, DEFI, Crypto, NFTs**.

- **ReactJs**, VueJs, Django, **Apollo.**

- **SQL, Redis,** DynamoDB, **CouchDB**, **MongoDB, Elastic-Search** etc.

- Google Cloud Service, Serverless, **Firebase**, CI, **CircleCI, GIT, Github actions** etc.

- E-commerce development and Implementation

- **Mocha, chai, chai-http**, **Jest, Cypress**, **E2E and unit testing**.

- **Object oriented programming.**

- **Functional programming.**

- **Generic template programming.**

- **Cryprography**

- **Wireframing and UI/UX Designs** (**Figma**, Adobe creative suite - XD, **Lightroom**, Illustrator, **Photoshop**)

- **Documentation.**

WORK EXPERIENCE

2022 - 2023

WEB3 / BLOCKCHAIN DEVELOPER - FREELANCE

- Help clients understand the technological boundaries in which to design.
- Gather requirements, functionalities, and translate those into elegant prototypes, MVPs, and final solutions, using cutting edge technologies like Solidity, React, Typescript, Web3.
- Wrote smart contracts to solve clients needs.
- Help clients to deploy projects across multiple chains.

2021 - 2023

SOFTWARE DEVELOPER - SHYPPLE

- Help the team understand the technological boundaries in which to design.
- Gather requirements, functionalities, and translate those into elegant prototypes, MVPs, and final solutions, using cutting edge techologies like React, Typescript and Material UI.
- Assist with the comprehensive design and technical specifications for new and international markets (International payments and transfer).
- Optimize the performance of front-end solutions with component based architecture.
- Optimize the performance of API endpoints for better user experience.
- Mentor and provide knowledge transfer to junior developers.

2020 - 2021

SOFTWARE DEVELOPER - TU DELFT

- Research solutions for application development needs.
- Gather requirements, functionalities, and translate those into elegant prototypes, MVPs, and final solutions, using latest javascript techologies like Vue.js, Electron and Gridsome.
- Collaborated with team to develop a desktop app solution for researchers, using Electron.js and Vue.js.
- Optimize the performance of front-end and back-end solutions.
- Mentor and provide knowledge transfer to junior developers.
- Create and maintain automated regression test packs, with source code management using tools like GitHub and CI tools like CircleCI.

2021 -

LEAD DEVELOPER / FOUNDER - NAEME

- Actively lead scrum ceremonies on new products, planning, features and demos through collaboration product managers and other developers.
- Lead a team of software engineers responsible for the development, maintenance and revamp of various platforms (Web based, and native mobile apps).
- Research solutions for application development needs.
- Gather requirements, functionalities, and translate those into elegant prototypes, MVPs, and final solutions using Typescript and React for the web app, React Native for the mobile app and Graphql + Django for the API.
- Create comprehensive design and technical specifications for new market.
- Optimize the performance of back-end and front-end solutions.
- Mentor and provide knowledge transfer to junior developers.
- Conducted interviews to hire technical talents.

2020 -

LEAD DEVELOPER - NATURE UI (OPEN SOURCE)

- Designed pixel perfect components using tools like figma.
- Researched technologies that best suits components requirements (React, Emotion.js etc).
- Optimize the performance of front-end components with subsequent version releases.
- Write well documented codes for other collaborators.
- Write documentations for components with both storybook.js and website documentations.

2019 - 2019

SOFTWARE DEVELOPER - EQUIRADAR

- Implemented UX improvements with ElasticSearch and Vue.js.
- Optimize the performance of front-end components.
- Collaborated with other developers to write codes that supports multiple languages.

2017 - 2019

FULL-STACK DEVELOPER - DREAMWORKS SYSTEMS SOLUTION

- I taught students basic web development which involved HTML, CSS and Javascript.
- Researched new technologies for application development needs.
- Gather requirements, functionalities, and translate those into elegant prototypes, MVPs, and final solutions, using latest web techologies like React.js, Graphql and Nodejs.
- Collaborated with team to develop a document management app for use by local governemnt institutions.
- Optimize the performance of front-end and back-end solutions.
- Mentor and provide knowledge transfer to junior developers.

2016-2017

UI/UX & GRAPHIC DESIGNER - FREELANCE

HOBBIES

- I love sharing my knowledge on UI/UX, graphic designs, and blockchain by writing technical articles.

- I enjoy playing football, bulking up in the gym and I create contents on these topics.
